A03 各向异性交换改变曲面起伏

$e(\mathbf{q}) = 1 - \cos q_x + \eta(1 - \cos q_y)$，$\eta = 0.35$；$e = \varepsilon / J_x$

$0 \le e \le 2.7$

高度与颜色都表示同一激发能；两幅曲面采用相同的 0–4 能量范围，可直接比较纵向带宽。
