C06 质心沿直线移动：速度由整个频谱平均得到

$\langle n_\mu(\tau)\rangle = \langle n_\mu(0)\rangle + \tau\langle v_\mu\rangle$；$\mathbf{v} = (\sin q_x, \eta \sin q_y)$

圆点：数值演化；实线：谱平均速度（精确矩关系）；虚线：中心波矢处群速度（窄谱近似）。
