C11 各向异性也改变波包形状

$\mathbf{q}_0 = (0.7, 0.7)$，$\sigma_x(0) = \sigma_y(0) = 4$；比较 $\eta = 1$ 与 0.3

$v_y = \eta \sin q_y$，所以同一初态下 $\mathrm{Var}(v_y) \propto \eta^2$。
